

2019-20 MPS Essentials of School Culture and Climate Survey

Franklin School

Collaborative Staff

Teacher response rate: 45%

Staff response rate: 32%

Prepared by the Office of Socially Responsible Evaluation in Education at the University of Wisconsin, Milwaukee.

How to interpret the results

The first figure presents the overall results of the Collaborative Staff scale of the ESCC survey and the subdomains of the scale. The shaded areas reflect the range of Collaborative Staff ratings for MPS schools. The light blue shaded area represents the bottom 25th percentile, or 1st quartile, of schools. Each darker blue shaded area represents the next quartile, such that schools in the darkest shaded area are in the top 25% of schools, or most organized in that area. Where the second and third shaded areas meet represents the average Collaborative Staff rating for all MPS schools.

Your school's score (a black dot) on each of the components of the Collaborative Staff scale reflects the average of your staff ratings on the questions that comprise that component. All survey responses were adjusted to be on a four point scale. Higher scores reflect more organized schools. Locating your school's scores within the distribution of other school scores across MPS allows you to identify strength and challenge areas both internally and comparatively.

Subsequent pages present your school's results for each of the specific questions that comprise each domain measured in the survey. These figures show the percentages of your staff that chose each of possible answers to the questions. In addition, these figures show the average percentage of staff in other MPS schools that chose each of the possible answers to the questions. These figures will help you understand what is driving your school's results.

Overall Collaborative Staff Results

The shaded areas reflect the range of Collaborative Staff ratings for other MPS schools. The light blue shaded area represents the bottom 25th percentile, or 1st quartile, of schools. Each slightly darker blue shaded area represents the next quartile, such that schools in the darkest shaded area are in the top 25% of schools, or most organized in that area. Where the second and third shaded areas meet represents the average Collaborative Staff rating for MPS schools. Your school's score (a black dot) on each of the components of the Collaborative Staff scale reflects the average of your staff ratings on the questions that comprise that component. All survey responses were adjusted to be on a four point scale. Higher scores reflect more organized schools. Locating your school's scores within the distribution of other scores across MPS allows you to identify strength and challenge areas both internally and comparatively.
